Title:

INFECTIOUS WASTE TREATING APPARATUS

Document Type and Number:

Japanese Patent JP2003093909

Kind Code:

A

Abstract:

PROBLEM TO BE SOLVED: To provide an infectious waste treating apparatus which finely crushes infectious waste incapable of being disposed as it is, stabilizes a treating time of heat sterilization and the crushed shape of waste and economically treats the medical waste, etc.

SOLUTION: This infectious waste treating apparatus is constituted in such a manner that a crushing tank and a first sterilization tank are disposed on upper and lower parts, the waste is finely crushed by a blade part of a rotating disk while the waste is pressed against a crushing disk which rotates in the crushing tank by a pressing disk, and crushed pieces of waste are dropped to the first sterilization tank which is positioned on the lower part through a notched groove disposed on the outer periphery of the crushing disk, is heated while being stirred by a stirring vane in the first sterilization tank, thereby, is dried and sterilized.
